TOILET TRAINING WEBINAR

Toilet training can be a daunting process for any parent. In this workshop we address some of the most common questions we have from parents such as: How do I know if my child is ready to be toilet trained? What is the best way to go about teaching my child to use a toilet? Do I use a potty or toilet seat, pull ups or underwear, have my son sit or stand? How do I teach them to use the toilet successfully? What do I do if they have an accident? Throughout this workshop we will answer these questions and provide ABA based strategies and recommendations.
