

Assessments & Behaviour Interventions

SOCIAL SKILLS GROUP /PEER INTERACTION

A weekly Social Skills program for school-aged children to bring peers of a similar age together. The goals of this group will be to provide therapeutic assistance to build their life-long individual and social skills. This is encouraged through topics such as:

- Confidence building
- Perspective taking
- Social problem solving
- Social interaction
- Developing and maintaining friendships

These groups are targeted for children aged 6-9, and 10-13, and are run year round. A screening process is held to allow us to form the most suitable and beneficial groupings. These groups are run subject to availability.
